SUMMARY

Detail oriented and self motivated aspiring Software Engineer with a Higher National Diploma (HND) in Computing and a strong foundation in Java, SQL, HTML, CSS, and software engineering principles. Experienced in designing and developing academic software projects using object-oriented programming, Agile methodologies, and the Software Development Life Cycle (SDLC). Passionate about building reliable software, solving real world problems, and continuously learning modern technologies and AI tools to improve software development.

PROJECTS (ACADEMIC)

ATM Management System (Java)

Jan 2026

- Developed a console-based ATM Management System using Java.
- Implemented account management, deposits, withdrawals, balance inquiries, and fund transfers.
- Applied object-oriented programming concepts including classes, methods, inheritance, and encapsulation.
- Designed UML diagrams and performed system testing.
- Managed source code using GitHub.

Technologies: Java • OOP • GitHub • UML

Simon Game (Java)

Present - 2026

- Built a Java-based Simon memory game.
- Implemented game logic, user interaction, and debugging techniques.
- Strengthened programming and problem-solving skills through practical development.

Technologies: Java | OOP

System Analysis & Design Project

Present - 2026

- Produced a Software Requirements Specification (SRS).
 - Created Use Case, Activity, and Class Diagrams.
 - Applied SDLC principles throughout system design and documentation.
-

EDUCATION

HND in IT othm Level 4 & 5

(Expected Graduation: August 2026)

@First Friends Campus, Kandy, Sri Lanka.

- Relevant coursework in Software Engineering, IT Project Management, System Analysis & Design, and Database Systems.
 - Developed software solutions and project documentation using Agile methodologies and industry standard tools.
-

ADDITIONAL INFORMATION

- Programming: Java, SQL, HTML, CSS, Javascript, Node.js , Go
- Languages: English
- Certifications: AWS – Building a Generative AI-Ready Organization, Claude 101 (Anthropic)
